

Accept **Twenty Twenty One (2020NE)**

After an unexpected turn of events last year
We need to be cautiously optimistic in this new year
We have to accept the new-normal way of living
Making adjustments to our routine and being.

The destruction we are causing to our environment is huge
Which in turn is bringing trouble to us, could be a revenge
We have to accept the universal principle of philosophy
Of what we give is what we will get back in plenty.

While it may appear as small of our mis-contribution
But it adds up very big of all the collective humanity
We have to accept that small drops together make the ocean
And so to stop the degradation everyone has the responsibility.

To play a role in the protection of planet earth, our home
We don't need to look-up or wait for an inspiring leader
We have to accept to see inside of ourselves to be the transformer
And start the process of change in our habits and lifestyle.

We need to realize the consequences of our current methods
All we need is the will power to be empathetic of our future
We have to accept that we don't have a chance to run for the cover
If we continue the past way of living into the coming days and years.

Our thinking and actions must dictate our lives going forward
And so we can reverse the global destructive trends to some extent
We have to accept that we can win with positive thinking and being bold
Nothing should appear as impossible for our own betterment.

Conservation should become our second nature
That we shouldn't exploit it but carefully nurture
We have to accept that nature is powerful and stellar
And we are just a dust particle before it's infinite power.

It may appear that no one is going to understand these aspects
As the majority will continue the insensitivity in their daily lives
We have to accept in the power of ourselves to make a new beginning
To initiate a domino effect of changes, setting an example of inspiring.

It's us, us & us and not they, they & they in our outlook
As we can control ourselves, and not others on how they live and work
We have to accept that we too have the capability to set the right trend
And be the saviour for the future generations, giving them the same green world.

Realize, Act and Inspire, but first Accept that We Have the Power.

Wishing You all A Very Happy, Prosperous & Safe New Year 2021
