

Care 2019

As one year ends and other begins
Let's embrace CARE, all inclusive
The one word, that is pervasive
Amongst all the living beings.

Care all the relationships
Grooming them carefully
Being there for the needy
Without any expectations.

Care for the whole family
Immediate or extended, all equally
Being the savior, intentionally
Building the bonds, emotionally.

Care for the all around community
With all that you can contribute, personally
Not to worry, what you get in return
Surely, you will be blessed, in the long run.

Care for your nation
The one that gave you an identity
Proudly, for what you are today
Who else could have given you that position.

Care for the world, in total
Not to fight with egos, that are fake
As boundaries are all man made
And resources belong to all.

Care for our (deteriorating) environment
Without which we can't exist
Being aware of the global problems
Small or big, taking positive actions.

Care everyone – weak or strong
Being human, has to reflect in everything
In our thoughts, attitude and behaviour
Surely that way, in every endeavour.

Care, care, care, ... in all aspects
It has to become our mantra yaar
As we welcome a brand New Year
With smiles and folded hands.

Wishing you all a Very Happy, Peaceful and Caring 2019
