

Chaos 2026

It's been a chaotic world, last few years
Wars all over, uprisings, imposed tariffs
From being a global interconnected nations
Getting disconnected with boiling borders.

A passing period of changing power structures
Many countries are stamping their presence
Wanting to demonstrate non-aligned independence
Unsettling the traditional, so called, super powers.

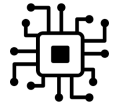

Driven by pseudo-nationalistic strategies
Driven by greed, power hungry and egos
Driven by religious, racialistic and regional biases
Some nations are getting into terrifying chaos.

The leadership is no longer of governance
Or about the well being of the citizens
It's about power, corruption and self focus
And practicing senseless bad politics.

Technology development and innovation
Happening at hypersonic speed in adaptation
With no guardrails of safety in implementation
With people getting devastated in this experimentation.

No country is being allowed to live in peace
They have to side with one party or the other
Or face a coup orchestrated by a foreign rogue
At the end the country collapses and suffer.

There are no more allies, friends or enemies
Every country has to live only with frenemies
With no permanence in the relationship
Anything could change overnight, be ready for the shake-up.

The world is living on a massive unpayable debts
A few in each country are pocketing the wealth
Increasing the gap between the haves and have nots
Inviting the common public's uncontrollable wrath.

Wars now come in different flavours
Military wars, trade wars, social wars
And so on, weaponizing every product
Remotely controlling and monitoring every aspect.

However, there is a sliver lining to every situation
Few leaders are standing tall and showing the restraint
There is still some positivity amongst this negativity
Let's fight through this chaos to make the world orderly
Hope shouldn't be forgotten however bad is the condition
Everyone contributing with their affirmative action.

Praying for Strength to Beat the Chaos in 2026 for a Blessed and Peaceful Years Ahead.
Girish Elchuri
