

Covid 19 Care

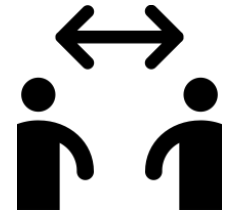

*Covid Cases are, day by day, increasing
The spread of the virus is accelerating
Young or old, whoever on the way, it's infecting
The rising numbers are really alarming
Appears, this massive attack is just a beginning.*

*Wear the mask, with nose and mouth properly covering
Not on the chin or on the forehead for the namesake wearing
Preferably wear a N95 mask and keep it on when outside
Make it a habit, for your safety, without any questioning
It's for you not to get the virus, but also to prevent spreading.*

*For the safety of our near and dear, we need to be far and clear
Maintaining social distance, giving virus no chance to jump and contract
Doesn't matter, known or unknown the rules needs strict implementation
You will find many in public places who are very reluctant
It's our responsibility to alert them to stand not so near.*

*Doesn't matter what are government rules and guidelines
We must impose our own lockdowns by all means
As we take control, of our's and our family's lives
Irrespective of the behaviour, around us, of all the members
We must be firm on our resolve to practice our own rules.*

Be Practical, Be Truthful & Be Careful. Stay Safe of Covid 19.
