

Elections 2019

**Elections are coming
Political voices are rising
For the attention of the voters
To get elected and obtain the powers.**

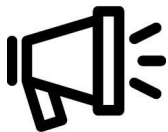

**Throwing promises, sops and freebies
With no economic sense or logic
Making us believe of good times
As if things will improve as a magic.**

**We get to see the contestants
The only time in few years
With hugs and shaking hands
Requesting for our valuable votes.**

**Technology is fully into action
Embracing big data and analysis
For understanding people's minds
To put right messages in their promotion.**

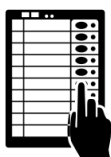

**Claims and counterclaims will rule
Personal attacks will become a tool
With negativity, projecting fake as true
Assuming voter is a fool.**

**Money is spent in a countless manner
On the media and banner
Attracting everyone's eyeballs
And putting some in voters pockets.**

**Whatever the parties say
We must apply our own mind
Not to fall for the tricks and sway
Voting for what we believe in good.**

**But do get up and vote
That's our responsibility, please note
One way to contribute in democracy
To build our nation with the right legacy.**

**Wishing you a Happy and Sensible Voting
Girish Elchuri**
