

2008

Yes, I want, in 2008 and beyond...
Like to hear, see, feel...and continue

The lush greenery on the mountains
Touching the clean blue skies
Standing tall with pride
Telling the tales of generations behind.

The chirping of the birds
To the gentle music of leaves
To the raindrops that raises the dust
In the forests, full of life.

The rhythmic waves of the water
For the colorful fish to swim and sway
Hiding the mystic existence of creatures
Deep inside the mother nature.

The aroma of the flowers
Attracting the lovely butterflies
That fill the air with freshness
Giving feast to the eyes.

Do you want too... ?

Then, let the threat of global warming
Just be a scientific warning
With all of us, awakening
To the amount of destruction we are causing
Taking the right steps, realizing
Our responsibility, in protecting
The Solar System's...only lively sibling
Our home, the only home...the planet Earth.

Wishing You and Your Family A Very Happy, Responsible and Cheerful
New Year 2008...and Beyond
