

# My Clean House

My house is clean

I have an exhaust in the Kitchen

All the oil is out of my den

What happens to that air then

That I don't know and I don't care.

My house is clean

I throw garbage on the road outside

All packed in a plastic bag, loosely inside

What happens to that garbage then

That I don't know and I don't care

My house is clean

Put all the dirt into the toilet and flush

Clean with soap and nicely brush

Will that dirt clog the pipes

That I don't know and I don't care

My house is clean

I use all the plastic stuff

That can be thrown out in a buff

What damage it causes to the environment

That I don't know and I don't care

My house is clean

Just pour the extra oil into the drain

Otherwise dealing with it is such a pain

What happens with so much oil in the water

That I don't know and I don't care

My house is clean

I put electronics gadgets into the garbage

Otherwise they cause me so much damage

What happens to the dump yards with e-Waste

That I don't know and I don't care

My house is clean

With all the dirt out of my house

And I have a pleasant smell to my nose

What happens to my neighbourhood or environment

That I don't know and I don't care

Why should I ?

You Should

Keep the house Clean

Grade and dispose all garbage properly

Not to use plastic, focusing on reuse and recycle

What happens to your neighbourhood or environment

You must be aware and care for it

Otherwise, the earth is destroyed & with it all of us.
