

Peace 2023

The world is becoming increasingly chaotic
Pandemics, terrorism, senseless capitalism, wars
No care for the people's sufferings
With leaders behaviour being totally idiotic.

While people are busy in a blind rat race
For all the wealth they want to accumulate
The leaders are busy to gain all the power
Not satisfied with what they have and want more.

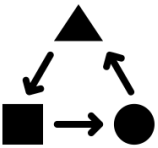

Not worrying about the consequences
Either to the environment or any living beings
To grow and grow, suppress all others
Destroy anything to blow out the hurdles.

Live and let live is not on their mind
As their hunger is infinity and growing
Not realizing there is a limit to anything
For that negativity, the universe will not be so kind.

Life and death and many cycles of that is inevitable
For anything and everything that we can see
What do we do with all that we ruthlessly earned
When everything around us is all doomed.

For a body to survive, all of it have to be healthy
If one organ fails, the ill effects will spread widely
Similarly, the world is very interdependent
Foolish to assume one can survive by destroying a part.

It's time we spread peace, not hatred or violence
Truly, all the religions talk in unison voice
To respect all others and live cheerfully together
Showing care and love to make our lives better.

Let's not fall for the carpet bombing on our minds
With constant brainwashing with fake narratives
Let's develop a mind of ourselves, to think logically
Seeing through their agenda and the games people play.

Let's pray we all will be blessed to be peaceful
From this new year and era that's coming
And we contribute our part to be blissful
For a serene and positive world in the making.

Wishing You and Your Family A Very Peaceful 2023 and Further.
