

# Retirement

Retirement, in an establishment  
Is to tell, you are getting old  
It's no astonishment  
They don't realize old is gold.

Retirement, for some is an entitlement  
When asked to go early  
Also can be seen as a punishment  
When the excuses are given vaguely.

Retirement, some see it as freedom  
From the punishing schedules  
And the authoritative bosses fiefdom  
Who push people with impossible tasks.

Retirement, some take it ahead  
For personal or health reasons  
Not that they can't work or lead  
Because they know the life priorities.

Retirement is the beginning  
Of next but important inning  
That let you pursue your dreams  
Freely without any pressures.

Retirement gives you time  
To connect and learn about you  
And so you can internally shine  
To find and cherish the peaceful you.

Retirement is to spend with families  
Otherwise, would have ignored in the travels  
Due to the routine of job or business  
So fill the days with happiness.

Retirement need to be seen positively  
Looking forward for the quality life  
Focusing on body, mind and spirituality  
A phase well spent, is foundation for the next life.

Dedicated to all those who have retired or going to retire in the future.
