

The Ban Culture

Everyday something is banned
Preventing us from doing that thing
Most of them are senselessly penned
With no alternate for anything.

Parking is banned at many places
Not showing where to park
How do you expect shoppers
When police are there to challan in a spark.

Commercial establishments are a sour
As they are banned every nook and corner
But then give them a dedicated space
Scientific planning is what govt has to embrace.

No place to go in the evening and unwind
In restaurants/bars live music is banned
By those who can't differentiate noise and music
This ignorance in our country is really classic.

Some eating habits are banned
Triggering emotional confrontations
It's people who are affected
As they are nothing but irrational politics.

Women are banned into certain temples
Not realizing they are our jewels
Though we have many goddesses
Our attitude towards women is a total miss.

Liquor is prohibited and banned in some states
One more example we focus only on the symptom
As our govt can only think, on or off, binary bits
Where not ban, but controls have to be the norm.

But there are many things we have to ban
Which are not in the minds of law makers
Banning many to bring peace to everyone
And keep at bay the troublemakers.

Ban the inequality by caste, creed or religion
Ban the incompetence in every responsible function
Ban all forms of cheating and corruption
Ban citizens meting out justice with an emotion.

More importantly ban the bans
That are illogical and senseless
Ban those who give those bans
Making them absolutely powerless.
