

Uncertainty

*Uncertainty is killing
It's very unforgiving
Making life confusing
Not sure of future that's coming.*

*Uncertainty is a state of our mind
When no answers can be found
For the situations that are not sound
As desperation is taking over the ground.*

*Uncertainty is always there
Feeling that life is going nowhere
Bringing sadness that's difficult to bear
Pouring problems onto in full gear.*

*Uncertainty is not certain always
It comes and goes in life as phases
Bringing periods of dark days
Surely, they will be testing times.*

*Uncertainty will face the defeat
When you refuse to bend at its feet
Having will power stronger than concrete
And the readiness to fight it and beat.*

*Uncertainty can surely be handled
Have positive thoughts fully loaded
With determination to face the grind
Praying with faith and hopes abound.*
