

Vision 2020

*As one more decade is done and dusted
The destiny of our world is in doldrums
Due to our self destructive deeds
It's going to be all agony going forward.*

*Need of the hour is a clear vision
To achieve, together as a mission
In the journey together, to save ourselves
With focus on the coming generations.*

*Our actions may not bear the fruit immediately
Not even during our living presence
But we must put our efforts relentlessly
As our contribution for human sustenance.*

*A vision to grow our economy
With our actions making sense economically
Focusing on long term financial viability
Contributing to the growth and stability.*

*A vision to protect our environment
Giving priority to the ecology safe development
In all that we dream and implement
Constantly working towards the betterment.*

*A vision to practice empathy
To reflect our importance for humanity
To think from others perspective
For the better of all, in collective.*

*A vision to be ethical
Being law abiding and moral
Always being honest
In each and every aspect.*

*A vision to show that we are humans
Being the intellectual creature
Never forgetting our responsibilities
Behaving sensibly for a better future.*

*Let's start with this vision
To act and show we all do listen
To the call of the decaying nature
And to protect the disintegrating culture.*

*Wishing you all A Very Happy and Vision Filled 2020 and Further
Girish Elchuri, Balaji & Hima Bindu*
