

Waves of Misery

Misery comes as sequence of waves
Waves of tsunamis and earthquakes cause destructions
Infectious Covid waves can give deadly blows
And life is full of troublesome periods.

It's the hope we live with, always
That we will recover from the problems
Looking for opportunities that offer solutions
In a lifetime, experiencing many such downs.

Feeling bad for the issues that envelope us
Praying for them to go away relieving us and our families
After all we are humans, with strong expectations
Terribly pained when things don't go as per our plans.

When the end of troubles is not visible
Even after suffering the whole lifetime
Problems returning instantly after a happy minute
Wonder what's causing this depressing fate.

However positive we are, in our thoughts
Going about in putting heartfelt efforts
Still the results don't come, it truly pains
Sure, the life loses all the motivations.

Yes, as mentioned in many spiritual manifestations
We put the efforts without expecting the outcomes
But it's not easy to keep working harder and harder
When you don't see it, making life any merrier.

It's a reality that everyone will be showered with blessings
And the testing times are the effect of our past deeds
So, focus on all the good things happening in our lives
Not bother for things we don't have, stop the cravings.

Let's realize every dream, is our own imagining
As we create them based on our needs of living
It could be sheer ignorance or our surrounded setting
That we live in a never-ending loop of wanting.

The peaceful times will always embrace the good humans
Who are pure in their thinking, divine in their living
Lead a purposeful life, taking care of all the beings
Dedicating the focus with a goal of soul fulfilling.

So, let's put our efforts, to keep things simple
Focused on realizing and achieving our life's purpose
Training our mind to stay unattached from the unreachables
Sincerely seeking to accomplish our life's set goals..
