

What an Year it Was !

Year 2020, what an year it was
It broke the smoothly running continuum
Shook us to the core in all respects
Bringing to screeching halt, the momentum.

We were arrested in our houses
For extended periods and with fear
Taking away all our support systems
Can't even see our near and dear.

Our health care became top priority
Searching for all our traditional methods
With focus on building the immunity
Not want to be anywhere close to the virus.

It was an unexpected thunder in our lives
So many losing their lives and livelihoods
Still struggling to recover from the shocks
Of never ending lockdowns and economic downturns.

It surely made us to change our outlook
Of how we need to live and work
Caring for ourselves, family and those around us
As it can affect many for one mistake of ours.

The scope for errors reduced drastically
Being careless can bring upon us the doom
We can no longer take things casually
Otherwise the virus can come to us in a zoom.

While it has devastated the humans in a big way
The environment got a chance to recharge
And the animals, occupying our space, had a field day
Making us realize and accept that we are destructive.

The year brought many changes in our lifestyles
Hopefully, we will stick on to many of the good habits
That we picked-up in the last few months
Some thru self realization, some forced upon us.

While many businesses went bankrupt
Many new opportunities opened up
Those who sense and catch the moment
Will definitely leverage and grow-up.

There is a silver lining for everything
We need to see and wait for the good
When the times and situations are bad
Embrace the new normal and get going.

Dedicated to all those suffered, but are ready to rise up with a will of steel
