

## Happy Women's Day

A woman makes your life complete  
Either as a mother, sister, wife or daughter  
Spreading caring love forever  
In any form that touches your life.

Understand the woman as she is  
Be a woman to sense what she is  
Reciprocate like a woman to feel how she is  
Think like a woman to see how she sees.

Be sensitive to the woman in your life  
Give respect to the woman you come across  
It is not about giving equality  
It is about giving due respect, always.

A society that treats the woman well  
Demonstrates the future that will spell  
Happiness, love and wealth for generations  
Making them peaceful and prosperous nations.
