

# Women's Day 2020

A woman in your life makes it complete  
And without one, life is on the deplete  
The one who realizes their strengths  
And gives their due, embraces success.

It's sad that many see them from wrong angles  
And become mad in abusing them with no decency  
We have to put efforts and motivate all others  
In correcting the mindsets to respect their privacy.

Time and again it's proved without any doubt  
If there is a woman in the team and is treated well  
The team gets results and becomes efficient  
And that's the lesson to learn and implement for all.

This heartfelt respect to the woman must begin at home  
Sincerely practicing to treat women on par in every aspect  
Teach the girls to be brave what trouble may come  
Teach the boys to understand girls' perspectives with respect.

There is no shortcut, but the society be a living example  
When the family and community members demonstrate  
The behaviours will be on the moderate  
Giving freedom to all, it's that simple.

Woman are compared to nature  
For their power of what they can give  
In an equitable and selfless manner  
That's why Super Powers are all women, no wonder.

This Women's Day, let's dedicate for the realization;  
Women of their power and contribute  
Men to respect and involve  
For a world that livens the power of women.

Wishing all the Women a Happy Women's Day, Today & Everyday
